The HealthManagement Principles

**Mission**

Drive ongoing enhancement in healthcare management for accessible, superior, patient-centred care.

**Commitment**

Empowering healthcare professionals and organisations. Champion competitive hospital governance, optimising culture and winning practices to meet stringent quality standards and operational efficiency.
HealthManagement is the trusted partner of more than 100 highly respected professional associations, institutions, and relevant congresses, serving as an important information hub.

Supported by a high-level Editorial Advisory Board, peers, and key opinion leaders, HealthManagement makes for a reliable portal and business journal to stay up-to-date in healthcare.

Consequently, it boasts a membership of more than 50,000 healthcare professionals from key disciplines.

The platform is providing answers to healthcare challenges, sharing best practices and bold ideas for better care delivery. Learning how to identify problems, how to evaluate technologies, solutions, and opportunities is key. Expert advice guides on how to implement successful change.

The reviewed Journal, four dedicated channels EXEC/C-Suite, Imaging, Cardiology, and Healthcare IT, expert communities, and the web portal engage the audience. Articles, blogs, videos, podcasts, congress reports, interviews, webinars, events, and the latest news are available 24/7/365.

The covered topics span a wide range and include all aspects of interest to professionals involved in management. A detailed overview is provided in the Editorial Calendar.

Why Partner with the Market Leader in Healthcare Management and Leadership?

- Endorsed by prominent stakeholder associations and trusted by every relevant congress.
- Trust is rooted in expert knowledge and peer-to-peer education.
- The editorial strategy revolves around the members’ needs and interests.
- Peers and key opinion leaders are the backbone shaping the editorial content.
Editorial Advisory Board

Globally recognised experts, influential thought leaders and peers are leading the strategic direction and shape content.

Why Submit to HealthManagement.org?

• HM is a comprehensive platform that facilitates healthcare professionals and organisations in sharing winning practices.

• With a respected editorial advisory board and support from key opinion leaders and experts, HM has established itself as a trusted and valuable portal for staying up-to-date on the latest developments in healthcare.

• HM assists healthcare professionals and organisations in navigating the complexities of the modern healthcare landscape and developing strategies for success.

• We actively encourage the application of innovative strategies and a re-evaluation of health delivery and achieve the best possible outcomes for patients.

• As the trusted voice of many international healthcare organisations, HM provides our partners with invaluable exposure to a unique and influential audience, allowing them to leverage HM’s unbiased brand value.

• Your research will effectively reach key decision-makers, and your expertise will be promoted via a trusted internal channel.

• Over 100 trusted partners place their reliance on HM as their valued platform.

How to engage with the market leader in healthcare management?
• Journal Article (board reviewed)
• Interview
• Movers & Shakers
• Blog Post
• Regular contribution
• DigiTalk
• DigiFlash
HealthManagement welcomes original articles and blog posts from healthcare professionals on healthcare management, leadership and winning practices.

We welcome your insights into topics in healthcare management, which includes perspectives from Hospital Administration, Imaging, Cardiology and IT. Examples of previous cover stories include Patient Power; Value-Based Healthcare; Ageing; View to the Future.

We welcome submissions on the following topics:
- Management and leadership in healthcare
- Human resource management
- Healthcare IT management – including telehealth, electronic health records, interoperability, mHealth, security
- Radiology management – including decision support, quality control, enterprise imaging, safety, dose management
- Cardiology management
- Other specialist areas such as oncology, laboratory, diagnostics, pharma etc. always with management angle
- Other management and leadership topics
- Point-of-View article with commercial interest (charge)

These topics are not prescriptive. Submit your abstract or email your ideas to edito@healthmanagement.org

Benefits of publishing with HealthManagement
- Share your ideas with our global readership of health managers, imaging and radiology, IT, cardiology leaders, and hospital managers
- Inclusion in our online faculty section
- Established publisher (20 years of journals)
- Circulation of 50,000+
- Publication on HealthManagement.org website with about 200,000 monthly visitors
- Active engagement at major hospital, cardiology, healthcare IT and radiology congresses (EAHM, ECR, ESC, RSNA and many more)
Instructions for Authors

Article Submission Form
Complete and return the article submission form provided before you submit the completed article.

Article Format
• Word count: minimum 700 words, maximum 2000 words
• Submit as Microsoft Word or compatible
• Left-justified, single-spaced

Article structure
The first page should contain:
• Summary sentence (about the article, to go at top of article and in table of contents)
• Key points. At the top of the article provide 3-6 sentences in bullet points, which summarise the major themes of the article
• Title of the article (max 50 characters including spaces), preceded by (TITLE )
• A subtitle if required preceded by (SUBTITLE)
• Name and job title of the author(s) – Institution/organisation, town/city and country, contact email address – please note the email address is for publication, Twitter handle

Headings and subheadings
Use subheadings for each section of the article preceded by (SUBTITLE).

Conclusion
Your article must have a conclusion, which should be succinct and logically ordered. Knowledge gaps should be identified and future initiatives suggested.

Spelling
HealthManagement uses UK spelling (eg ionising, specialise, tumour, paediatric, haematology etc.)

Abbreviations and acronyms
Please spell out the full word at the first use and acronym thereafter. Abbreviations should not be used. If there are many acronyms provide a separate list at the end of the article.

Product references
In general, articles should be vendor-neutral. Where products are mentioned, the reference should be product name including ® or ™ if applicable, place, country.
Currency
Prices and costs given in U.S. dollars should have the Euro equivalent in parentheses afterwards.

Illustrations and images
Authors are encouraged to include photographs, figures and/or tables. These can be illustrative or summarise findings or recommendations. Please supply images as high-resolution (300dpi) jpegs or tiffs, and include any image credits. The author is responsible for ensuring permission for publication of images has been secured. The editors reserve the right to ask for evidence of permission.
Graphs and tables can be supplied in Word, Excel or Powerpoint format and will be recreated if required by the HealthManagement art department.
Any illustrations should be clearly referred to in the text, and supplied with captions. Numbers and captions go above the figure; table numbers and captions go beneath the table. In addition, please add the filename of the relevant image to the text reference.

References
Any references that are deemed important to understanding of the article should be cited within the article. Citations within the text for a single author HealthManagement uses an in-text author-date referencing system. For a guide please contact the editors. For space reasons, articles in the print journal may be published without the full list of references, which are made available on the website.

Copyright
HealthManagement retains copyright of the article.

Conflict of Interest
Please disclose any actual or potential conflicts of interest.

Proofing
Following copy-editing to house style, authors will receive their page proof for final review and approval prior to publication.

Revisions
Two article revisions are included free of cost. Any additional revision is charged 200 EURO.

Checklist for Authors
Before you send in your article, please check that you have included the following:
✓ Job title, email address and organisation for each author
✓ Short bio for each author
✓ Hi-res (300 dpi) image of the author(s)
✓ List of references in Harvard format
✓ Key points at the top of the article
✓ Word count at the end of the article
✓ Email your article to edito@healthmanagement.org
Code of Journalistic Principles

Freedom of expression is one of the fundamental rights of man, an essential condition for public opinion to be enlightened and informed. In its concern to preserve the integrity and freedom of the press, the Belgian Association of Newspaper Publishers, the General Association of Professional Journalists of Belgium and the Federation of the Information Newsletters have adopted the following code of principles of journalism in 1982.

1. FREEDOM OF THE PRESS
   Freedom of the press is the main safeguard of freedom of expression without which the protection of other basic civil freedoms cannot be ensured. The press must have the right to collect and to publish information and commentaries without hindrance, to ensure the forming of the public opinion.

2. THE FACTS
   Facts must be collected and reported on, unbiased.

3. SEPARATION OF INFORMATION AND COMMENT
   The separation between facts reporting and commentaries must be clearly visible. This principle must not prevent the journal/newspaper from presenting its own opinion as well as the viewpoints of others.

4. RESPECT FOR THE DIVERSITY OF OPINIONS
   The press recognises and respects the diversity of opinions and defends the freedom of publishing different points of views. It opposes all discrimination based on sex, race, nationality, language, religion, ideology, culture, class or conviction, provided that the convictions thus professed are not in contradiction with the respect of fundamental human rights.

5. RESPECT FOR HUMAN DIGNITY
   Publishers, editors-in-chief and journalists must respect the dignity of and the right to private life of individuals and avoid all intrusion in physical or moral suffering unless considerations related to the freedom of the press make it necessary.

6. PRESENTATION OF VIOLENCE
   Crimes and terrorism as well as other cruel and inhuman activities must not be glorified.

7. CORRECTION OF ERRONEOUS INFORMATION
   Facts and information proved to be false must be corrected without restriction and without prejudice to the legal provision of the right to reply.

8. PROTECTION OF SOURCES OF INFORMATION
   Sources of confidential information cannot be revealed without the explicit authorisation of the informant.

9. SECRECY
   Secrecy of public and private affairs as defined by law cannot prevent the freedom of the press.

10. HUMAN RIGHTS
    Should the freedom of expression be in conflict with other fundamental rights, it is up to the editors (in consultation with the journalists concerned) to decide, on their own responsibility, which right they will give priority to.

11. INDEPENDENCE
    Newspapers and journalists must not give in to any outside pressure.

12. ADVERTISEMENTS
    Advertisements must be presented in a way that they do not mix with factual information.
Editorial Calendar - Issue 1 and 2

Set by leading industry professionals the editorial road map covers all relevant aspects of healthcare and hospital management

Issue 1/2024

Copy 26 January
Approval 2 February
Publishing 23 February
LJR 26 February

Cover Story: Precision Medicine
Precision medicine combines data science and healthcare, digging into multiomics to decode a patient’s genetic, proteomic, and environmental data. Uncovering individualised biomarkers, it guides precise targeted therapies, revolutionising treatment strategies for superior outcomes. We will look into advances in tailored healthcare by precision medicine, treatments and equipment accelerating personalised well-being.

**Cover Story: Most Regrettable Decisions**

Regrettable healthcare management decisions, including errors, missed opportunities, and resource allocation pitfalls, can prove costly and impactful. Learning from these missteps is vital for crafting more efficient, patient-centric healthcare systems, ensuring the preservation of both health and trust. We will explore various facets and showcase how these issues were rectified.

**Cover Story: Virtual and Retail Healthcare**

Virtual healthcare enhances access and equity with remote consultations, optimising the patient experience at home. Retail Healthcare excels in customer-friendly, in-person services, boosting accessibility and convenience. Both are reshaping healthcare through innovation, personalised care, and enhanced efficiency. We will explore the “Status Quo” and look into real and available applications and solutions.

Cover Story: Disruptive Eco Systems
Disruptive healthcare ecosystems reshape the industry, fostering cross-collaboration, efficiency, and patient-centric care through technology. Innovations like wearables, AI, blockchain, and IoT empower consumers. Electronic health records and big data enhance care. We will explore new business opportunities and solutions, advancing healthcare towards sustainability, safety, and effectiveness.

Cover Story: Talent-Driven Gamechangers
Talent-Driven Game Changers in healthcare recognise that, in an ever-evolving landscape, successful business transformation extends beyond tools and technology. It hinges on strategic acquisition, performance management, employee retention, adaptive planning, and innovative workforce models. Embracing these aspects unlocks the full potential of a dynamic healthcare sector.
